

AkknaTek GmbH is a young startup company and specialized in development of innovative technologies in the field of medical imaging. To strengthen our team in Saarbrücken or Kaiserslautern in the field of software development, we are looking for a motivated and qualified team member as:

Software Engineer (m/f)

What you can expect:

As a software developer you can expect responsible and diversified tasks. You will be involved in planning and implementation of software, as well as technical documentation. Through your actions you will actively contribute to development and design of our products and therefore profit from an interesting and challenging market field. Beyond that you will also be involved in the discussions with potential project partners.

Your profile:

- Bachelor or Master degree in computer sciences, electrical engineering, mechatronics, biomedical engineering, or comparable studies.
- Professional skills in C++ and C#
- Practical experience in image processing techniques
- Understanding of image acquisition technologies is very desired
- Experience in technical documentation is advantageous
- Experience with IEC 62304/IEC 62366 is highly advantageous
- Team work, creativity, motivation
- Minimum 2 years of professional experience
- Knowledge of German language is not required

What we offer:

- Steep learning curve
- Possibility to make a contribution to one of the most attractive segments in the field of medical devices
- Friendly and open minded working atmosphere
- Flat hierarchies and fast decision making
- Flexible and family-friendly working hours

Interested?

If you are interested we are looking forward to your application, including your salary expectation, as well as your next possible date of joining via mail to: career@akknatek.com
